

Instructor Fault Insertion Utility (FACET) - Version 1.1

[Download FaultUtility11 \(FaultUtility11.exe - 5144 kB\)](#)

The Instructor Fault Insertion Utility is a tool that allows you to insert and remove faults or circuit modifications in any FACET board at your convenience. With this tool, you can change the behavior of a FACET board, where faults and circuit modifications are inserted and removed automatically as the course is completed. The tool is compatible with the serial-port and USB-port versions of the FACET computer interface base unit. Instructor Fault Insertion Utility can be installed in any personal computer running under one of the following Microsoft® operating systems: Windows® 98, Windows® Me, Windows® 2000, or Windows® XP.
