General Description

The Manual Base Unit with Built-In Power Supply contains a total of 32 circuit-modification (CM) and fault switches. Students manually select CM switches as the course progresses, while the protected fault switches are reserved for the instructor use by means of an integrated locking cover assembly.

This base unit comprises an accessory kit containing the terminal posts, connectors, adapters, and patch cords required to perform experiments on the FACET training module.

Two light-emitting diodes (LEDs) on the base unit also indicate that power is on and that experiments can be performed.
