## **General Description**

This support is a mast designed to support the Radar Jamming Pod Trainer when it is used to perform electronic jamming against the Radar. The large base of the mast provides stable support of the Radar Jamming Pod Trainer. Soft pads attached under the base allow the mast to glide softly over the surface of the Target Positioning System.

Reflecting the commitment of Festo Didactic to high quality standards in product, design, development, production, installation, and service, our manufacturing and distribution facility has received the ISO 9001 certification.
