## General Description

The Rotameter is a variable area flowmeter specifically calibrated to measure the air flow in a compressed air setup. It provides a direct visual reading of the flow by simply observing the position of a float inside the transparent graduated tube.

Reflecting the commitment of Festo Didactic to high quality standards in product, design, development, production, installation, and service, our manufacturing and distribution facility has received the ISO 9001 certification.

Festo Didactic reserves the right to make product improvements at any time and without notice and is not responsible for typographical errors.
