## General Description

The Platinum RTD 100 is a resistive thermal device which uses the change of electrical resistance of platinum with changing temperature to determine the temperature. The model is provided with a T-shaped connector and a thermowell for inclusion in the process loop.

Reflecting the commitment of Festo Didactic to high quality standards in product, design, development, production, installation, and service, our manufacturing and distribution facility has received the ISO 9001 certification.

Festo Didactic reserves the right to make product improvements at any time and without notice and is not responsible for typographical errors.
