General Description

The Instrumentation Mounting Pipe is a vertical pipe used to install instruments, usually differential-pressure transmitters, at the appropriate height and close to the point of measurement. The mounting pipe replicates the common industrial practice of installing a measuring instrument directly on the process pipe or on an adjacent one. The Instrumentation Mounting Pipe can be mounted on both sides of the Process Workstation or on the Instrumentation Workstation.

Reflecting the commitment of Festo Didactic to high quality standards in product, design, development, production, installation, and service, our manufacturing and distribution facility has received the ISO 9001 certification.
