General Description

The Base Unit Upgrade Kit allows the use of the Base Unit, Model 91000-4, with a USB interface instead of a serial link. The Upgrade Kit consists of a cable with a USB connector at one end and a DB9M connector at the other end. The kit also comes with a CD-ROM (Model 39167) providing the required drivers for communication with the Base Unit. A readme file explains how to install the drivers. With this kit, users are able to use the Base Unit, Model 91000-4, with their current version of TechLab.

Reflecting the commitment of Festo Didactic to high quality standards in product, design, development, production, installation, and service, our manufacturing and distribution facility has received the ISO 9001 certification.

Festo Didactic reserves the right to make product improvements at any time and without notice and is not responsible for typographical errors.
