## General Description

The Three-Phase Contactors, Model 8848, contains two independent contactor to switch resistive or non-resistive loads on a three-phase network. Contactor coils can be actuated using AC line voltage or low DC voltage using an included solid-state relay (one for each contactor). AC connections are made using 4 mm safety sockets and DC connections are made using 2 mm miniature jacks.

Reflecting the commitment of Festo Didactic to high quality standards in product, design, development, production, installation, and service, our manufacturing and distribution facility has received the ISO 9001 certification.

Festo Didactic reserves the right to make product improvements at any time and without notice and is not responsible for typographical errors.
