## General Description

The Add-On Support, Model 46601-G, consists of a support rack that can be installed on the two-workstation Work Bench, Model 46601-2. This enables the user to place some of the bigger modules on the front and save space on the work surfaces of the bench.

The Add-On Support, Model 46601-G, is a variant of the Add-On Support, Model 46601-F, that does not protrude from the work bench and thus requires less space. It does, however, require a wiring duct.

Reflecting the commitment of Festo Didactic to high quality standards in product, design, development, production, installation, and service, our manufacturing and distribution facility has received the ISO 9001 certification.

Festo Didactic reserves the right to make product improvements at any time and without notice and is not responsible for typographical errors.
