General Description

The Process Workstation is the backbone of the system on which the processes take place. It consists of a double-sided mobile workstation comprising a tank and a centrifugal pump. The steel frame of the Process Workstation ensures the reliability and longevity of the system.

The Process Workstation is delivered partly-assembled and requires assembling before use. The station is mounted on lockable casters to facilitate its mobility.

Reflecting the commitment of Festo Didactic to high quality standards in product, design, development, production, installation, and service, our manufacturing and distribution facility has received the ISO 9001 certification.

Festo Didactic reserves the right to make product improvements at any time and without notice and is not responsible for typographical errors.
