## General Description

The Coriolis Flow Transmitter is a flow measurement device using the Coriolis forces generated when a fluid goes through the flowmeter to measure the mass flow of liquid in a pipe. Since the Coriolis Flow Transmitter measures the mass flow, the measurement is not affected by changes in the temperature, viscosity, and density of the fluid. In the industry, the Coriolis Flow Transmitter is useful to measure the flow of liquids containing solid particles or blend of ingredients.

Available Coriolis Flow Transmitters:

- 46924-0 Coriolis Flow Transmitter (HART)
- 46924-A Coriolis Flow Transmitter (WLAN, Heatbeat, HART)

## List of Manuals

Description	Manual number
Coriolis Flow Transmitter (Workbook) _____	585133 (85995-00)
Coriolis Flow Transmitter (Workbook (Instructor)) _____	585134 (85995-10)

## Table of Contents of the Manual(s)

### Coriolis Flow Transmitter (Workbook) (585133 (85995-00))

- 1 Fundamentals of the Coriolis Flowmeter

Reflecting the commitment of Festo Didactic to high quality standards in product, design, development, production, installation, and service, our manufacturing and distribution facility has received the ISO 9001 certification.
