General Description

The AC Drive consists of a variable frequency speed drive with V/Hz control. The AC Drive has programmable inputs and outputs, digital and analog (for PID Control). Some electrical connections can be made using either the banana jacks or the terminal blocks.

The AC Drive is available in two versions. Model 3183-2 requires three-phase supply (208, 380, or 415 V). Model 3183-C requires a single-phase supply (120 V - 60 Hz) and connects directly to any standard wall outlet with a separate power cord equipped with a 5 A fuse (Model 85360). Model 3183-C is not available for 220, 240 V - 50 Hz line supplies.
