## **General Description**

The Capacitor Start Motor, Cut-Away, Model 8251-C, is identical to the Capacitor Start Motor, Model 8251, except that a quarter of the machine has been cut away, revealing the different parts of the stator and rotor. This enables students to better observe the construction of the machine. Note that cut away machines only include the machine itself (i.e., they are not housed in a module).

Reflecting the commitment of Festo Didactic to high quality standards in product, design, development, production, installation, and service, our manufacturing and distribution facility has received the ISO 9001 certification.

Festo Didactic reserves the right to make product improvements at any time and without notice and is not responsible for typographical errors.
