

A Revamped Mobile Demo Room with More Learning Systems

Our Mobile Demo Room has been completely remodeled. It is now ready to hit the road!

For the past two years, this mobile lab has been visiting campuses of US high schools and universities, as well as industrial training facilities. Instructors and students alike were thrilled.

The wide scope of training systems from Festo Didactic is largely represented and easily accessible for hands-on exercises. Among the featured learning systems included in this lab on wheels, you can see the following systems in action:

Date
September 30, 2014

- [Instrumentation and Process Control Training System](#)
- [MecLab®](#)
- [EduKit PA](#)
- [Mind-Sight](#) (Learning Content Management System)
- [MPS 200](#) (Modular Production System)
- [Electric Power Technology Training System](#)
- And more

Do not miss the opportunity to get a firsthand look at the mobile demo room in the exhibition hall at the upcoming ACTE Vision 2014 in Nashville, TN. We will be waiting to see you in booth 401.

[Contact us](#) if you would like to schedule a visit of the mobile demo room to your school or organization. Note that we also build and customize mobile labs for schools and training centers.
