

## Advanced Manufacturing Training Sessions in May 2015

Festo Didactic offers an advanced manufacturing training program for industry partners in May 2015 in several locations across the USA.

A great benefit of our training is the immediate improvement of productivity and product quality through a sustainable upgrade of employee skills and effectiveness. Training is primarily aimed at Machine Operators, Factory Technicians, Maintenance, Engineers, and Training Managers.

You will find more information (course offerings, topics, locations, contact information, etc.) in the documents listed below:
