

TSTC WEST TEXAS CONTINUES TO OFFER QUALITY TRAINING AND EDUCATION FOR HVAC TECHNOLOGY

 [Print this article](#)

Texas State Technical College West Texas has recently received two state-of-the-art trainers. Air Conditioning Technology students are getting tons of hands-on experience using the Lab Volt Geothermal Training System and Energy Management Training System. These trainers allow instructor Van Robbins to input faults which students must troubleshoot and correct. This experience provides TSTC students with invaluable hands-on training, allowing them to enter the workforce ready to make an immediate impact. As the use of green technology increases, technicians with experience in these new, more efficient units will be needed.

For questions regarding this story, the Air Conditioning Technology Program or if you are interested in hiring a graduate please call Van Robbins, Instructor at **254-559-7748**.
