

The Advanced Mechatronics System at a Vocational and Technical Skills Competition

On May 8 and 9 the "13e Olympiades québécoises de la formation professionnelle et technique" (roughly translated as the 13th Vocational and Technical Skills Competition) were held in Quebec City, Canada. It is a provincial competition leading to Skills Canada – similar to Skills USA.

SIEMENS was the sponsor of the Industrial Electronics competition. As a partner, Lab-Volt was offered the opportunity to display its Advanced Mechatronics System as a training platform that integrates the latest technologies from SIEMENS, such as SIEMENS S7-1500 PLC and SIEMENS Comfort Panel HMI.

SIEMENS has recently appointed Lab-Volt as a Corporate Partner for SIEMENS Mechatronics Systems Certification Program (SMSCP). SMSCP is the international, industry-standard, comprehensive skills certification in mechatronic systems offered by SIEMENS together with partner schools around the world.

Special thanks to SIEMENS for this valuable exposure!
