Lab-Volt®

Electromechanical Systems Simulation Software (LVSIM®-EMS) - 1 User(50-8970)
Product Fix: Drivers for the PCI network security device are missing on the CD-ROM.

Release Date: 2002/02/14

Affected Model(s): 6385, 6485, 8970, 9480, 9481 (-PX to -WX)

Affected Product(s): LVSIM-HYD 1.11, LVSIM-PNEU 1.01, LVSIM-EMS 2.1 r2, LVSIM-ACOM 1.2, LVSIM-DCOM 1.0

Brief Description of the Problem:
Drivers for the PCI network security device are missing on the CD-ROM.

Full Description of the Problem:
The new network security device card uses a PCI expansion slot. The drivers required for this new card are not included on the CD-ROM.

How to Fix:
Download and run the self-extracting file PF1039.EXE. Refer to the user manual of the affected models to install the PCI drivers for the network security device.

Note: In the procedure given in the user manual, replace the path X:\\Hardlockpci by the folder where you saved the files extracted from file PF1039.EXE. (usually C:\\LABVOLT\\PF1039)
